#### Comment

Incorrect calculation of the length of the text in individual lines

Step	1
	<u>-</u>
Action	Click the stanza number in the list next to the "Strofy" description to add stanza text
Input data	
Expected result	The current stanza text box has been opened
Step	2
Action	Create the first line of stanza text in the text box
Input data	
Expected result	<ul> <li>the counter counts and shows the length of the text in the first line</li> <li>the counter shows the number of the current line correctly</li> </ul>
Step	3
Action	Click Enter
Input data	
Expected result	The counter resets the text length and line number
Comment	<ul> <li>the counter does not reset the text length</li> <li>the counter resets the line number only when the user starts typing text</li> </ul>
Step	4
Action	Create the second line of stanza text in the text box
Input data	

Expected result	<ul> <li>the counter counts and shows the length of the text in the second line</li> <li>the counter shows the number of the current line correctly</li> </ul>
Comment	The counter shows the length of text of the first line. The value starts to change when the text of the second line is longer than the text of the first line
Step	5
Action	Click the verse number in the list next to the "Refreny" description to add verse text
Input data	
Expected result	The counter resets the text length and line number
Step	6
Action	Create the first line of verse text in the text box
Input data	
Expected result	<ul> <li>the counter counts and shows the length of the text in the first line</li> <li>the counter shows the number of the current line correctly</li> </ul>
Step	7
Action	Click Enter
Input data	
Expected result	The counter resets the text length and line number
Comment	<ul> <li>the counter does not reset the text length</li> <li>the counter resets the line number only when the user starts typing text</li> </ul>
Step	8
Action	Create the second line of verse text in the text box
Input data	
Expected result	<ul> <li>the counter counts and shows the length of the text in the second line</li> <li>the counter shows the number of the current line correctly</li> </ul>
Comment	The counter shows the length of text of the first line. The value starts to change when the text of the second line is longer than the text of the first line
